Disclaimer

The information in this packet does not carry any classification, therefore it is suitable for distribution to anyone that has interest in genuine Cummins service tools.

The information was deemed correct to the best of our knowledge at the time of publication.

Any tool availability dates are estimates and subject to change without notice.

General Updates

We don't have any new tools to present this month, but we've still been busy:

- We've been working on updating our connector database for new engine models as well as working backward to update legacy models.
 - Engine model profiles added/updated weekly.
- We're getting ready to kick off a project that will consolidate tool information into one location that will replace our current Service Products catalog on QSOL and will function more like our connector database.
 - Targeted implementation in the 3rd quarter of 2019 .
- We have several repair network requested tools that we're working on currently.
 - Most of these are targeted for release in the first half of 2019.
